Trauma-informed practice and consultancy

Accessibility Statement

August 2026

Lotus Horizon® is committed to providing our specialist family legal services to all people.

For us to do that we recognise that lotushorizon.co.uk must also be as accessible as possible to all people.

We have taken guidance from W3C Web Content Accessibility Guidelines (WCAG) which forms the basis of the European Accessibility Act (EAA). As we provide (civil) Legal Aid services we have also taken guidance from GOV.UK for public sector websites and applications.

[Lotushorizon.co.uk](https://lotushorizon.co.uk) is hosted by Wix, which features many built-in accessibility options including zoom, speech recognition, screen reading and keyboard navigation. We have tried to ensure colour contrasts are easily readable and we have provided alternative text descriptions for any relevant images and links. When we update the website we carry out scans which help highlight any possible accessibility issues. Our website updates can occur at various points throughout the year and ahead of the formal review of accessibility (and this document). Regardless of how many periodical reviews we have carried out, we will undertake an annual review of our website accessibility every August.

If you, or someone you know, has experienced any difficulties or glitches on our site we would greatly appreciate you letting us know so we can resolve the issue as quickly as possible.
